### **FHFA Index Shows Mortgage Interest Rates Continue to Rise in September**

**Washington, DC** – National data show interest rates on mortgages continued their upward trend. Contract mortgage interest rates increased 0.11 percent from August to September, according to an index of new mortgage contracts.

According to the Federal Housing Finance Agency (FHFA), the National Average Contract Mortgage Rate for the Purchase of Previously Occupied Homes by Combined Lenders index was 4.38 percent for loans closed in late September. The index is calculated using FHFA's Monthly Interest Rate Survey. The contract rate on the composite of all mortgage loans was 4.36 percent, up 11 basis points from 4.25 in August.

Interest rates are typically locked in 30-45 days before a loan is closed. Consequently, September data reflect market rates from mid-to-late August. The effective interest rate was 4.51 percent, up 11 basis points from 4.40 percent in August. The effective interest rate accounts for the addition of initial fees and charges over the life of the mortgage.

FHFA's interest rate survey shows the average interest rate on conventional, 30-year, fixed-rate mortgages of \$417,000 or less was 4.63 in September, an increase of 14 basis points. The average loan amount for all loans was \$270,100 in September down \$4,400 from \$274,500 in August.

FHFA will release October index values Tuesday, November 26, 2013.

For more information, call David Roderer at (202) 649-3206. You can hear recorded index information by calling (202) 649-3993. You can find the complete contract rate series at [www.fhfa.gov/Default.aspx?Page=251](http://www.fhfa.gov/Default.aspx?Page=251).

## National Average Contract Mortgage Rate

Technical note: The data are based on a small monthly survey of mortgage lenders, which may not be representative. The sample is not a statistical sample but is rather a convenience sample. Survey respondents were asked to report terms and conditions of all conventional, single-family, fully amortized purchase-money loans closed during the last five working days of the month. The data did not include mortgages guaranteed or insured by the Federal Housing Administration or the U.S. Department of Veterans Affairs. Data also excluded refinancing loans and balloon loans. September 2013 data are based on 6,951 reported loans from 27 lenders, which include savings associations, mortgage companies, commercial banks, and mutual savings banks. The effective interest rate includes the amortization of initial fees and charges over a 10-year period (the historical assumption of the average life of a mortgage loan).
